

ABSTRACT

An anti fibrotic agent, comprising a sphingosine 1-phosphate (S1P) receptor agonist or sphingosine 1-phosphate (S1P) as an active ingredient.

- 5 Since an S1P receptor agonist, particularly S1P, has activity of inhibiting fibrosis in various organs, it is useful in preventing and/or treating diseases caused by fibrosis in organs, such as pulmonary fibrosis, interstitial pneumonia, chronic hepatitis, hepatic cirrhosis, chronic renal failure, renal glomerulosclerosis, *etc.*
